To Whom It May Concern:

On behalf of the Bluewater Recycling Association, it is my pleasure to recommend Delta Global Logistics as a reputable supplier of container delivery services.

The Association has been using Delta Global Logistics since 2010 to deliver its wheelie bins to new customers during our launch phase of new programs. We have had several launches during that period and we keep going back to Delta to provide that service because we can count on them to accurately deliver the selection of containers requested by the customers in a timely fashion at a reasonable cost.

Their staff is familiar with the task at hand, they are approachable by our customers, and are conscientious about the assembly and placement of the bins, which really facilitates for a smooth uneventful launch.

Changing program types is stressful for customers and the new container delivery is a critical component to ensure a smooth transition to a successful conversion.

When we launch new programs across municipalities, we only make one call for the delivery portion of the containers and that call goes to Delta Global Logistics every time. They provide us with peace of mind.

Should you have any questions, please do not hesitate to contact me at 519-228-6678 extension 225 or email at bluebox@bra.org.

Yours truly,

In this cleaner environment.
